Conveyor Belt Cleats, Sidewalls & Profiles

Upright T-cleats, forward-angled L-cleats, corrugated sidewalls and underside tracking profiles for custom belt fabrication. Compare exact stock codes and profile sizes, then specify the layout on a belt drawing.

Range: T-20 to T-100, L-30 to L-80 and listed tracking profiles

Selection basis

Specify the base belt, cleat height and pitch, sidewall arrangement, guide position and smallest pulley diameter. T-cleat feet are welded flat to the belt with the rib upright; corrugated sidewalls run continuously along the belt edges.

Engineering values to confirm before ordering

Tensile strength / allowable tension, working temperature, minimum roller or pulley diameter and unlisted ply counts are not specified in this range listing. Request the manufacturer data for the selected SKU. Profile dimensions and codes are not a substitute for base-belt thickness.

Industry applications

Incline conveying: Cross-cleat and sidewall layouts for controlled product retention.

Food & packaging: White and colored attachment options matched to the selected base belt.

Tracking & lateral loading: Plain or cogged underside V-guides matched to the conveyor groove.
